Scheuten Solar extends BIPV product line

During the Intersolar 2009 from 27 until 29 May, Scheuten Solar will present their extended product line of BIPV products.

The temporary BIPV market asks for aesthetic building design solutions that suit challenging construction requirements. Thanks to many years of experience with both glass and PV products, Scheuten Solar is proud to present a BIPV solution that seamlessly fits those high requirements. By adding an integrated PVB interlayer to the product line we offer far-reaching possibilities for our customers' varied and complex projects. The extension of the product line is the first step with more additional products to follow this year.

The PVB interlayer in the glass-glass modules has become a standard in the glass industry and adds flexibility to meet project specific requirements. The PVB film is a perfect complement to our constant striving to reliable solutions for complex BIPV.

With more than ten years experience Scheuten Solar is a well known player in the BIPV market. The distinguishing strength of Scheuten Solar lies in the motto: Powerful BIPV Solutions. We are constantly improving our BIPV products and this has resulted in much talked about projects worldwide.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1600 and achieved a turnover of 467 million euro in 2008.

Scheuten Solar is a global player in designing, manufacturing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.
