## P R E S S R E L E A S E

### Mommaerts to become Scheuten Glas Diest

On 1 October Scheuten's Belgian subsidiary company will change its name from Mommaerts NV to Scheuten Glas Diest NV. This name change is in line with the other name changes of Scheuten undertakings in the past. The aim is to ensure unambiguous communication with both the market and customers.

Mommaerts has been a part of Scheuten Glas for something approaching twenty years. The company started up in 1994 by manufacturing double insulation glass. Thanks to its continuous development of manufacturing techniques, Scheuten Glas Diest has been able to offer an extensive top quality product range since the time of its establishment. The company premises located close to the E314 in Diest incorporate several production lines, a fully automated series of glass cutting tables for processing coated glass and an automated cutting table for large-sized laminated glass.

Like many other Scheuten business premises, the Scheuten Glas Diest building has also been fitted this year with 1,000 solar panels installed on the roof, providing a total output of nearly 200 kWp. These panels, for the installation of which Scheuten Solar is responsible, provide much of the power supply. A special feature of the installation is the innovative lightweight spoiler system. An aerodynamic housing around the solar panels ensures that no wind can get in under them. Since no roof ballast is needed, Scheuten Glas Diest's lightweight roof construction can also be fitted with Scheuten Solar panels.

- END -

***Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1,600 and has achieved a turnover of 467 million euro in 2008.***

***Scheuten continually invests in new developments. New innovative glass products are developed by combining knowledge from all its production facilities. Cooperation with leading universities and research institutes leads to sustainable, functional solutions in the fields of glass and solar technology.***
