PRESS RELEASE

Scheuten Solar delivers modules for solar project in New Jersey

Scheuten Solar announced the installation of almost 500 KWp of its Multisol® solar modules in its first New Jersey installation, at Astor Chocolate of Lakewood. The project was developed and installed by Renewable Power, a New Jersey based solar project developer headed by Dennis Wilson. With his extensive experience in the New Jersey solar industry, Dennis has been responsible for the installation of hundreds of residential and commercial solar electric systems.

Astor Chocolate is committed to lowering their carbon footprint and has been generating a sizable portion of their electric and thermal process needs with cogeneration for a number of years. Astor Chocolate believes that generating a major portion of their remaining electric needs was a logical next step in lowering their environmental impact.

Renewable Power chose to utilize Scheuten Solar modules based on their long history in the European solar industry, their excellent performance and best in industry performance warranty.

"We are delighted to partner with Renewable Power on this project and look forward to continuing a long and productive relationship. We commend Astor Chocolate for their vision and commitment to a cleaner environment", stated Dave Johnson, president of Scheuten Solar USA, inc.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo, The Netherlands. Scheuten employs over 2000 staff and achieved a turnover of around 400 million euro in 2009.

Scheuten Solar is a global player in designing, manufacturing, distributing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization.
